

## **Question for Full Council Monday 20<sup>th</sup> January, 2020**

### **Question 4**

#### **Cllr Roberts to Cllr Hallam:**

Previous requests have been made for data around bulky collections that may have subsequently been reported as fly tips and therefore collected as such before the bulky collection date. Can you confirm when this will be available?

#### **Response**

We do not appear to have received a request for this data. It would be very difficult to identify where a bulky collection has been booked but the same items have been reported as fly tips. The neighbourhood wardens, when advised of households with items outside will check to see if a bulky waste collection has been booked. Veolia would not have access to the same information so would collect from the property but the majority of bulky waste collections are outside a house so if it was determined that it was classified as fly tipping then enforcement action would be taken as a result and it would be very easy to identify the property concerned

**Cllr M Hallam**  
**Cabinet Member for Environment**
